

FIFTH ANNUAL BULLETIN

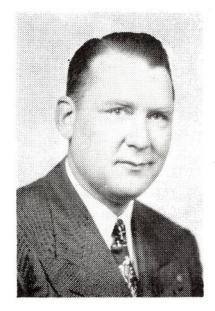

Report For The Year 1954

Our Fiscal Year, May I, 1954 To May I, 1955

THE PRESIDENT'S MESSAGE

Your officers and directors take pleasure in presenting this, our Fifth Annual Bulletin. Please save and study it as many questions you may have about our activities may be answered by the various committee reports. Any suggestions you wish to make will be welcomed by the proper committee, or it may be made at the Annual Meeting of the membership to be held sometime during July or August. Please plan to attend this meeting when you are notified that it is going to be held.

Our association, having been formed on April 22, 1950, is now in its fifth year. The efforts of many interested persons is being felt for the good of this group, as well as for the good of the community in general. The best way for us to show our appreciation for the "pioneers" of our association is to pay our dues without solicitation from a com-

mittee and to recruit your friends and neighbors into our association right now while you are thinking about it. Did you know that there are about 500 eligible property owners around our lakes? Our paid membership is less than 200.

What percentage of the people on your beach belong? Check the membership list furnished in this bulletin and let's invite everyone in this year. Every property owner or person living near the lake benefits to some degree from the activities of our association and should support it by belonging and taking a part in our program.

I am not going to comment on the accomplishments of the various committees because I feel their reports included in this bulletin are self-explanatory. I just wish to express a sincere thanks to them from the membership for their efforts and wish them luck in their ambitions for this next year. With just a little cooperation from everyone, our community will be a still better place in which to enjoy "lakeliving."

HAROLD F. CARLSON, President.

OFFICERS AND DIRECTORS OF THE LAKE DETROITERS ASSOshown in the photo above. They are, front row, left to right—Robert Bratt, secretary-treasurer,
Detroit Lakes; Willard Randolph, vice president, Detroit Lakes; Harold F. Carlson, president, Detroit Lakes, and Sam L. Chesley, director, Fargo. Back row—Carl J. Nedberge, director, Detroit
Lakes; Mel Brantseg, director, Detroit Lakes; William F. Hoganson, director, Detroit Lakes; Don C.
Brandvold, director, Crookston; and Henry Steining, director, Moorhead.

Meeting Of **Board of Directors**

12 Noon, Saturday, July 3, 1954

A meeting of the Board of Directors of the Lake Detroiters Association was held at the Detroit Lakes Country Club at 12 Noon on July 3, 1954.

The following directors were present: M. Z. Baxter, William Reid, S. A. Torgerson, H. C. Stiening and Harold F. Carlson. Chaun-

cy Boyer of the Boyers Spray Service was also present. This was a majority of the directors. Mr. Boyer stated he still had \$80.00 coming for spraying service for the 1953 season. This was for service to properties on the North Shore that Mr. McRoberts had been unable to collect for. According to Mr. Boyer, he had been instructed by McRoberts to spray these properties. McRoberts was Chairman of the Insects & Land Weeds Committee during the year in question. A motion was made by Torgerson, seconded by Carlson, paying this bill when presented with Mr. McRoberts "OK".

A discussion followed concerning the problems of the spraying service and the performance of the Membership Committee. It was decided that immediate action was necessary. A motion was made by Stiening seconded by Reid that Boyer employ a person to solicit memberships and sell spray service thru the asso-ciation. One half of the cost of this person would be borne by the association and one half the cost by Boyer. Motion carried. Mrs. Jack Pickering was suggest-

ed as the person to do this job.

Mr. Baxter called attention to
the dredging job undertaken by the Inland Lakes Boat Club. This project was the dredging of the channel between the two lakes. Suitable markers have also been installed.

Mr. Baxter asked the Lake Detroiters Association to participate in the cost of this project in the amount of \$150.00. A motion was made by Stiening, seconded by Torgerson and carried that the Lake Detroiters Association pay \$150.00 towards the cost of this

channel dredging. A motion was made by Stiening, seconded by Reid and carried setting the time for the Annual Meeting of the Lake Detroiters Association on July 31, 1954 at 2:30 P. M. at the Detroit Lakes Country Club. Mr. Baxter appointed William Reid, Otto Haakenstad and W. D. Humphrey to act as the nominating committee

for the Annual Meeting.

Secretary

* * * 1 P. M., August 7, 1954

A meeting of the Board of Directors of the Lake Detroiters Association was held at the Willard Randolph home at 1 p. m. Saturday, Aug. 7, 1954.

The following directors were present: Donald C. Brandvold, Mel Brantseg, Robert L. Bratt, Harold F. Carlson, Sam L. Chesley, William F. Hoganson, Carl J. Nedberge, Willard E. Randolph, and Henry C. Stiening all direc-

tors being present.

A letter from the state to Mr.

Stiening regarding lower taxation for cottage owners around the lake was read and President Carlson asked Mr. Stiening to

follow through on this matter and see if he could not get a bill through in order to get some relief on taxes.

President Carlson talked on committee activity and that the chairmen would have to push in order to accomplish anything. A complete discussion of committee projects was held in order that the chairmen of their respective groups would have a better understanding of their duties.

Discussion of means of secur-

ing new members was also held. There being no further business to come before the board the meeting was adjourned at 3:25

p. m.

R. L. BRATT, Secretary

February 12, 1955

A meeting of the Board of Directors of the Lake Detroiters Association was held at the Graystone Hotel with the following members present, Mel Brantseg, Harold F. Carlson, William F. Hoganson, Willard Randolph, and Henry Stiening, also present was Sid B. Amundson a member of the Utilities and Taxes committee.

A motion was made by Stiening and seconded by Brantseg that a bill relating to taxation of Lakeshore property be drawn up and submitted to the state legislature in 1955. The above motion was carried.

> R. L. BRATT, Secretary

March 19, 1955

A meeting of the Board of Directors of the Lake Detroiters Association was held at the Graystone Hotel with the following members present, R. L. Bratt, H. F. Carlson, Sam L. Chesley, W. F. Hoganson, and Carl Nedberge, also present was Clarence LaSelle chairman of the Annual Bulletin committee.

President Carlson stated that the Annual Bulletin should be out by May 1st if possible. Chairman LaSelle to contact all committee chairmen for Bulletin in-

formation.

It was suggested that W. F. Hoganson, chairman of the membership committee contact zone committee men and they in turn contact non members for membership. It was also suggested that Annual Bulletins be used when making solicitations for membership.

There being no further business to come before the board the meeting was adjourned at

2:00 p. m. R. L. BRATT, Secretary

Minutes Of Annual Meeting

July 31, 1954

The annual meeting of the Lake Detroiters Association was called to order at 2:30 p. m. July 31, 1954 at the Detroit Lakes Country Club. President M. Z.

Baxter, presiding.

President Baxter was informed by the Secretary that sufficient members were present to constitute a quorum. The following business was transacted.

As the minutes of the last annual meeting were published in the Annual Bulletin a motion was made, seconded and carried that we dispense with the reading of these minutes.

President Baxter announced the agenda to be followed for

the meeting.

Mr. Baxter displayed a map of the two Detroit Lakes. This map differed from previous maps in that it shows the various depths in the lakes. A motion was made, seconded and carried that map showing the depths of the lakes appear in the next annual bulletin.

A motion was made, seconded and carried that the President appoint a nominating committee. The following were appointed:

Wm. Reid, Otto Haakenstad and W. D. Humphrey.

Mr. Baxter recommended the continuation of Mrs. Jack Picker-

ing's work as contact and good-will person for the association.

The secretary read the final report covering the period from January 1, 1954 to July 31, 1954, a copy of which follows:

For the information of the membership a separate and complete report of the Aquatic Weed Killing project is given first.

HAROLD F. CARLSON Secretary-Treasurer

S. A. Torgerson reported for the Membership Committee. His report showed we had 82 renewal and 47 new active members for a total of 129 paid up active members. We are still carrying 35 members in this classification who have a still carrying as members in this classification. sification who have not paid. On sustaining members we have 16 renewals and 5 new members for a total of 21 sustaining members. On associate members we had no renewals, 2 new members for a

total of 2 associate members. We are still carrying 3 associate members who have not paid. A motion was made, seconded and carried to accept the above report.

Carl Nedberge reported for the Water Level Committee. He recommends the construction of a new damn at the outlet of Detroit Lake. The level at the present time is set at 3.90. Needed in the construction of a new damn would be a fish ladder. Willard Randolph stated that the present damn was originally built as a temporary structure. A motion was made, seconded and carried that this report be accepted.

Mrs. Akeley reported for the Insect Control Committee in the absence of her husband. She stated that the present program left a lot to be desired.

The point was made that the Townships could take over the spraying for insects and levy up to one-half mill for this purpose. A motion was made, seconded and carried that this report be accept-

A motion was made, seconded and passed to the effect that the Insects and Land Weed Control Committee be asked to explore Committee be asked to explore and promote the possibility of having the Township Boards of both Lake View and Detroit Townships and also the City of Detroit Lakes do an over-all job of spraying for mosquitoes in 1955, levying the tax allowed by law in each case, for this work and to cover such portions of the respective townships and the city respective townships and the city as seem appropriate to our committee and to the township and city authorities.

Note: In addition to all of the City of Detroit Lakes, it may suffice to spray only that portion of Detroit Township as lies south of the Northern Pacific tracks. In Lake View Township, it might suffice to spray the NE, NW and SW quarters of the Township, which would include Lakes Detroit, Melissa and Sallie. Spraying the entire Township would be more desirable, however.

Advise on the mosquito abate-

ment law can be obtained from T. L. Aamodt, State Entomolo-gist. Local governments are allowed to assess up to one mill for such work and intended to try to get the law ammended at the last session of the Legislature to enable a broader application, such as by entire counties in the state.

One law is cited as Laws of 1949, Chapter 104, and has been assigned to the Revisor of Statutes to Chapter 18 of Minnesota Statutes, being Sections 18.31-18.43 inclusive.

Tom Rogstad reported for the Aquatic Weed Killing Project. He stated that about 1¼ miles of lake shore had been treated. Results were spotty, probably due to the high winds a week before the spraying. He recommends continuing the program next year. A motion was made, sec-onded and carried that the report be accepted.

Wm. Reid reported for the Fish

& Game Committee. He stated that we were having a poor year due to the lack of cooperation from the State Department. The State claims that we have a better than average fish population in Detroit Lake. A motion was made, seconded and carried that

the report be accepted.

Henry Steining reported for the Utilities and Tax Committee. He had made a trip to St. Paul and also arranged for a meeting with Howard Spaeth, State Tax Commissioner, in order to at-tempt to get a more fair tax for lake property. He also had appeared before the Becker County Board on the same issue. A motion was made, seconded and carried that the report be accepted.
Stewart Schliff reported for the

Property Protection Committee. He stated he had called on the sheriff and found there had been practically no vandalism during the past year. He had called on the fire chief, and there were practically no fire losses. A motion was made, seconded and carried that the report be accepted.

In the absence of Kent Rogstad a report for the Roads and Traffic Committee was made by S. A. Torgerson. He stated that improvement in the road surfacing had been accomplished and that a new grade is in the program for the Nason Bay area. A motion was made, seconded and carried that the report be accepted.

Cy Young gave a brief report for the Water Craft Regulation Committee. A motion was made, seconded and carried that the report be accepted.

Ralph Hollands made the report for the Bulletin Committee. A motion was made, seconded and carried that the report be ac-

cepted.

Wm. Reid, Chairman for the Nominating Committee, placed in nomination the following to act as directors for the following year: Donald C. Brandvold, Mel Brantseg, Robert L. Bratt, Hardd F. Corley, Son J. Checker, old F. Carlson, Sam L. Chesley, William F. Hoganson, Carl J. Nedberge, Willard Randolph and Henry C. Stiening. A motion was made, seconded and carried that the nominations be closed and the secretary be instructed to cast a unanimous ballot for the slate.

Bill Stevenson made a motion that the Road and Traffic Committee be authorized to give consideration to the marking and naming roads and beaches on the lakes and compiling a list of property owners according to beaches. It was seconded and carried.

Otto Haakenstad asked to have traffic controlled on the Lake Drive by the posting of speed

Don Brandvold asked if the entire lake could be sprayed in the Weed Killing Project. Mr. Baxter stated that everyone is welcome to participate.

Meeting adjourned.

HAROLD F. CARLSON Secretary-Treasurer July 31, 1954

A meeting of the above named

board was called to order at 4:30 p. m. by Past President M. Z. Baxter. This meeting being held at the Detroit Lakes Country Club, immediately following the Annual Meeting of this Association. The following directors were present: Willard Randolph, Henry Steining Harold F. Carlson ry Steining, Harold F. Carlson, Sam L. Chesley, Donald Brand-vold and William F. Hoganson.

The following officers were elected for the ensuing year: Harold F. Carlson, president.

Willard Randolph, vice president.

R. L. Bratt, secretary-treasurer. Carlson took over his duties as president and a short meeting followed. It was suggested that a boat caravan be organized by membership canvassing committees and work in groups in selling the association to prospects.

Henry Steining asked to have a zoning ordinance put into affect around the lake. A motion was made by Brandvold, seconded by Chesley and carried to the effect that Steining investigate the possibility of having such an ordinance in effect. Steining was also instructed to contact the proper legislative committee and get a bill in the State Legislature giving lake cottages a new classification for tax purposes.

The Directors' meeting was set for August 7th, 1954, at 1 p. m. at the home of Willard Randolph.

HAROLD F. CARLSON Acting Secretary

REPORT OF Secretary And Treasurer

As of January 1, 1955 there were on our roster 143 Active members, 3 Associate members and 25 Sustaining members. This was a gain over 1954 of 25 Active members, 4 Sustaining members and 2 Associate members. The reason for this gain can be attributed in part to the employment of a membership solicitor and also to the efforts of some of the members taking an active part in securing new members. Again this year we ask that each and every member try to secure a new member so that our organization can become large and powerful large and powerful.

The following is a complete summary of receipts and disbursements for the period January 1, 1954 to January 1, 1955.

REPORT OF— **Auditing Committee**

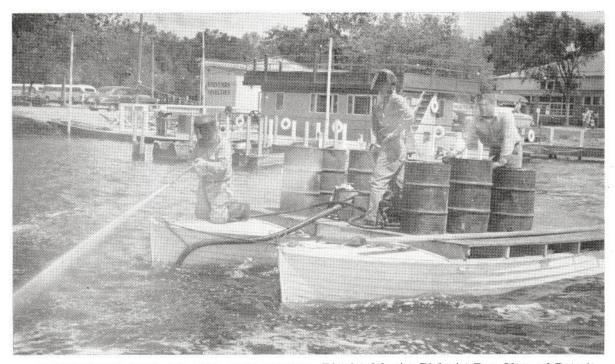

To: Members of the Lake Detroiter's Association:

This is to certify that I have audited the books of the Treasurer, R. L. Bratt and submit the following report for the period from January 4, 1954 to January 1, 1955.

Balance cash in the Detroit State Bank-1-4-1954\$1,957.36

Expenditures paid by checks numbered from 269 to 299 in-

Respectfully, WILLIAM BOZE 5402.96

District fisheries Biologist Don Olson of Detroit SPRAYING FOR WEEDS SPRATING FOR WEEDS Lakes is shown in the above photo with representatives of the Applied Biochemists and Associates of Milwaukee, Wis., attaching weeds in Detroit lake with the chemical killer, sodium arsenite. Dr. Bernard Domogalla is directing a spray of chemical onto the water. Nearly 3,500 feet of lakeshore on Lakes Detroit, Sally and Melissa were treated by the crew. The project was financed by the Lake Detroiters Association, Inc., and the Lakes Sallie and Melissa Improvement association. Results of the weed-killing experiment was not entirely satisfactory due to a number of reasons, chief of which was a heavy wind storm which tore weeds loose from their roots prior to the spraying, thus spreading weeds all over the lake.

Reports Of Committees .

Lake Weeds Killing Project **— 1955**

The following is a report made by the State Conservation De-partment on last summer's work with our lake weeds. We believe it is worth your careful reading.

The net of the situation is that last year's work was largely disappointing. Owners of certain shorelines reported satisfactory results, but, for the most part, we have to admit failure. You will note, in the report,

that the chief causes of failure were:

(1) the treatment date proved to be too early last year because of our very late Spring;

(2) the severe wind storm which tore loose many tons of weeds just a few days before treatment the weeds foliage was not growing and in position to absorb the poison.

Additional facts which were ob-

served, are:
(3) the existance, in our lake, of both early maturing and late maturing weeds-which complicates the problem and also makes its solution even more imperative —the need to stop the growth and the spreading of both kinds of weeds;

(4) the abundance of blue algae last summer and its much earlier than usual appearance (about June 15);

(5) the constantly low water level which prevailed last summer

(6) the presence, in considerable amounts, of "filamentus" type algae — the stuff that looks like weeds and which clings to rocks and/or to actual weeds and forms into long stringy masses.

The time has come now when we must decide about any weedkilling work to be done next summer.

As near as we could determine. from discussions last Fall, there are quite a few members anxious to have another go at the weed-killing effort. With them — "one inning doesn't make a ball game."

The Lakes Sallie & Melissa Improvement Association has already canvassed their membership and, we understand, are prepared to go ahead with another project of the kind. They have inquired about tying their program together with whatever we may decide to do. They have set a rate of 25c per front foot of shoreline in 1955. in 1955.

Your committee is willing to undertake the job again next summer, provided there is a positive desire for it by practically all owners of the shorelines selected. There is a powerful lot of work entailed and unless your committee is assured of really hearty support the project will dropped.

To simplify the job, in 1955, we are directing this inquiry only to owners whose shorelines were covered in last year's work, plus certain additional properties which have already organized their zone for the work. The rate will be 25c per front foot of shore-

If we are to go ahead with weed control work another year the local Conservation Department people will decide the date of treatment according to how the Spring weather develops and the existing growth of weeds at the time. This weed treatment with arsenite has worked wonderfully well in many, many instances and there is no doubt at all it can be successful here, under the right conditions.

DR. T. A. ROGSTAD, Chairman, Weed & Control Committee

Committee Reports (continued) . . .

Utilities And Taxes . . .

Your committee on utilities and taxes was called upon for a great deal of activity in the past year.

deal of activity in the past year.

Based upon the activity of the committee, functioning as a tax committee, I am happy to advise that we followed up on the work the tax committee did last year with reference to obtaining an adjustment evaluation of lakeshore property. The committee prepared an amendment to existing tax laws under which lakeshore cottages would be placed in a special category for tax purposes. This law was submitted to the president of the association. The president advised the writer of this report that the bill was given to the legislative representative of Becker County and introduced in the legislature to be acted upon by that body. The legislature is still in session and, so far as the writer of this report is informed, the bill is still in the Tax Committee of the legislature. I am frankly doubtful of its passage.

Respectfully submitted, HENRY C. STIENING, Committee Chairman

Fish And Game . . .

Very little activity can be reported by this committee, due to the recent fish survey by the State Game & Fish Department. According to this report, the number of walleyes in Big and Little Detroit are probably dying from scale bruises due to crowded conditions, which most likely accounts for the fact that fishermen who have fished the Detroits for years report fewer and fewer numbers of walleyes in their catches.

The merit of swivel chair versus daily encounter measure will be debated at a later date.

The two rearing ponds on the Bud Tong farm have been leased to the state to keep them in operating condition.

Sanitation and Pollution . . .

Below is a copy of letter submitted to the Mayor and City Council of the City of Detroit Lakes regarding industrial pollution of Lake Detroit:

May 2, 1955

Mr. Herman A. Ratz, Mayor, City of Detroit Lakes, Detroit Lakes, Minn. Dear Mr. Mayor:

This letter pertains to the milk processing plant on East Frazee Street and the use, by it, of the Pelican River for the disposal of waste materials.

This plant got into operation during the war. Its construction was started in 1944 as a government assisted project and, possibly because of war-time urgency and shortage of materials, it obtained a temporary permit to use the Pelican River as an outlet for its "cooling" water used in the processes instead of sending it into the city sewers.

The permit was issued on basis

The permit was issued on basis that only cooling water was to enter the stream—no milk wastes or chemicals.

Our last information on the subject was that the plant uses 250-300 gallons of water per minute, or 15,000 to 18,000 gallons per hour. The city storm sewer system in 1944 was inadequate to handle the volume of cooling water in addition to the water already being handled.

ready being handled.

If only "cooling" water was flowing into the Pelican there would be no great complaint, but from the very beginning of its operation this plant has been sending milk "boil-overs" into the stream at frequent intervals. As many witnesses know, the milk content is sometimes so heavy the water looks like it might be bot-

tled and sold. Also, the stream frequently carries a greasy brown scum or sludge.

This condition has prevailed for 10 years now and a large amount of nutrient material for weed and algae growth has entered our lake during that time. The weed situation has become serious indeed. Substantial damage has been done to lake shore properties from weed growth and the condition continues to grow worse each year.

Last summer a considerable amount of money was spent by property owners in an effort to reduce weed growth in our lake. The City of Detroit Lakes participated in this work for the benefit of the city bathing beach

and park shoreline.

During the past nine years there have been numerous protests registered with the milk plant management — all without results of a permanent character. There have been intervals of some abatement but no practical solution of the problem, and the damage to shore properties continues.

age to shore properties continues.

During all this time we have endeavored to obtain a correction of the situation by friendly efforts of persuasion. The following extract from the 1950 Annual Bulletin of Lake Detroitrs Association illustrated our willingness, at that time, to accept a further delay for the general good of the community and a peaceful settlement of the issue:

"Because this polluted water is an effluent from within the city limits of Detroit Lakes, it is believed to be a problem of the city, as much as it is a problem to be solved by the milk plant. And, as reported to the Annual Meeting, it seems that probably the best of several possible solutions is to get the city to construct additional sewerage capacity in the area of the plant.

"Our views on the whole subject were presented to the city council last October (1949) and we were advised that the situation would be taken into account in a general survey of the city's whole

drainage problem, then being un-

"The engineers's study, since completed, and submitted to the council, calls for construction of a 24" storm sewer to Holmes Street, near the power plant, to provide drainage capacity for all of that low area which is now (then) in-adequately served by a 12" storm sewer. It is our understanding that, upon completion of the work mentioned, the milk plant will be ordered by the City to make a connection with it.

"All of the above is contingent upon an approval by the voters of a special bond issue for sewer construction throughout the city. It is also contingent upon the availability of materials at the present time. A third hurdle to get over is any delay on the part of the milk plant in obtaining easement for the transit of its connection."

Then, the following paragraph on the same subject appeared in our Annual Bulletin for 1951:

"The city of Detroit Lakes has voted approval of a bond issue for the construction of additional sewer facilities for the city as a whole. * * * This additional drainage capacity in the area will permit use of the storm sewer for cooling water. * * * The milk plant has been notified by the city to be prepared to make a connection with the new facilities as soon as they are available."

The sewer job was completed, as scheduled, in 1952 and we had been under the impression the milk plant had made connection with the sewer in accordance with the order issued to it by the city.

Instead, during 1954 and so far in 1955, the milk overflow into the Pelican River has been as bad as it ever was. Also, in addition to the flow of milk wastes, we have reason to believe some caustic material and other chemicals may be entering the river from the cleaning and boiler blow-down operations of the plant.

In calling the matter to the attention of the milk plant management (which was changed a few years back) we have encountered a reluctance even to discuss the subject at all. Some of their per-sonnel have come at different times, upon our call, to inspect the river condition while the milk was running past, but there has been no positive declaration of their intentions with regard to channeling their waste into the sewer.

We feel sure the City of Detroit Lakes is aware of its own obligations in this matter of raw effluent into the river, coming as it does from within the city limits. It is hoped that positive action will now result after this long period of waiting on our part.

The situation is made more urgent by the fact the milk plant apparently still has to obtain an easement from owners of adjoining properties to make connection with the storm sewer. This could mean months of further delay unless immediate and compulsive effort is made to obtain such an easement and to complete the sewer connection this summer.

It is not our desire to force any hardship upon the milk plant but this appears to be an un-avoidable expense that should have been met long ago. It should have been met before damage was done to our properties and it should have been met without need for us to be taking the present action.
We feel that the interests of our

entire membership as well as the whole Detroit Lakes community are being damaged by any continuance of the conditions described. We have already too long deferred a positive determination

of the matter.

THEREFORE, we respectfully petition the City of Detroit Lakes, in accordance with the assurances given us in 1949, to take such action now as seems best to its governing body for the elimination of waste products of all kinds flowing into the Pelican River and Lake Detroit. Respectfully yours,

WILLARD E. RANDOLPH. Chairman, Sanitation & Pollution Committee, Lake Detroiters Association,

Property Protection . . .

The chief concern of the Property Protection Committee is in safeguarding of the homes and personal property of the members from such perils as fire and vandalism. The matter of fire protection, as afforded by the Detroit Lakes Fire Department, is important. We should like to cooperate with them in suggesting to the members every possible way of making the department's job easier in case fire does come.

We also want to pass on to the members all information that comes from the Fire Underwriters Bureau concerning proper construction of lake dwellings, plus the reports on the approved lists of home fire fighting equipment, as issued by the Underwriters Laboratories, where extinguishers and other such items are con-

stantly being tested.

As there is always a possibility of vandalism damage to property around lakes such as ours, we want to consider that, too, and by cooperating with the local sheriff's office, do whatever we can to minimize the hazard. In the past this has meant posting notices of rewards to be given to those who give information resulting in the arrest by vandals. Anything that we can do to assist further in the cooperation of our members with the local law enforcement officers is worth while.

Beyond this, as we have suggested before, we think it is within the scope of this group's activities to try to find some workable plan for restricting the use, or misuse, of land along the lake shore, to protect neighborhoods from the invasion of undesirable

enterprises. Our property values are extremely vulnerable to such a threat, so we would like to consider the possibility of some sort of zoning of residential districts around the lake.

This, in brief, is a general survey of the field of interest and action of the Property Damage Committee. We hope to present specific suggestions along these lines at the next meeting of the Association.

> STEWART SCHLIPF. Chairman.

Water Level Control . . .

The major problem we now have is the construction of a new modern dam at the Pelican River outlet on Little Detroit Lake. The present dam, now in a rather delapidated condition, was built as a temporary affair and should long ago have been replaced by a concrete structure to afford permanent protection for a suitable water level control. The present dam has been maintained at a minimum level of 3.90 as set by the Minnesota Department of Conservation a great many years ago.

There has been some discussion of the desirability of including a fish ladder into the plan for a new dam. There is, however, not sufficient information available as to the efficiency of such a device in a small stream and further study and advice is need-

ed on this matter.

The City of Detroit Lakes has a very real and vital interest in the welfare of the lake from which it takes its name and will no doubt be cooperative in any effort to maintain and improve the scenic beauty of this main tourist attraction.

It is to be sincerely hoped that something can be developed through a combined effort by those in authority and our interested citizens to provide the necessary funds for a project which will produce continued dividends for years to come.

CARL J. NEDBERGE, Chairman.

Roads And Traffic . .

All lake drives will be posted and patrolled for 30 mile speeds where necessary

The contract for the new road around the south side of Detroit Lakes has been let and the heavy machinery already going into ac-

Follow-ups on projects of last year are also in progress, covering: Nason Bay to Bridges Beach, Curfman Beach to Cox's Point, West Shore Drive, North Shore Drive, Beach County Memorial Drive, and landscaping around Pelican River outlet.

State Department Of Conservation

The following is a report on the assessment of results of Detroit, Sallie and Melissa lakes weed control from the State Department of Conservation.

During the week of June 14, 1954 considerable shoreline areas of Detroit, Sallie and Melissa lakes were treated for the control of aquatic weeds. The treatment with sodium arsenite was by Applied Bio Chemists and Associates of Wisconsin under the direction of Dr. Domogalla. The treatment was supervised by Mr. Don Olson, District Biologist at Detroit Lakes, and the writer. The method and concentration used were standard as determined by long usage in other areas. All areas listed in the permits were adequately covered.

Subsequently, considerable growths of weeds were observed in the treated areas. Considerable dissatisfaction with the results of the treatment was evidenced by many of the contributing property owners. As a result of this dissatisfaction and in effort to determine causes of failure a meeting was arranged for August 13th and 14th for examination of various treated areas.

Three or four points in treated areas on each of the three lakes were examined by Mr. Dunn, Mr. Humphrey, Dr. Domogalla, Don Olson and writer. In all areas examined the weed growth was heavy to moderately heavy. Most of the weeds observed were young exhibiting none of the brown tinting and incrustation of carbonates found on mature weeds. Reproductive structures observed on most plants were in the formative stage also indicating structures observed on most plants were in the formative stage also indicating young plants. This indicated to the writer that most of the observed plants had sprouted and grown after the effects of the treatment had dissipated. A similar conclusion was formed by Dr. Domogalla and Mr. Olson.

Without a week by week, or even more often, examination it is difficult to determine the exact reasons for failure of such a treatment. The facts known indicate two reasons for treatment failure. First, the treatment was given too early before enough weeds had sprouted to give a control resulting in visible reduction in weed growth. To control a given weed it must come in contact with the chemical in the water. This is impossible if it has not sprouted. Secondly, the terrific wind storm occurring a week before treatment tore up many weeds and left weeds and parts of weeds, all of which can sprout and grow, floating around the lakes for some time after. These weeds and fragments probably contributed considerably to the reseeding of the treated areas. In support of these conclusions, a heavy growth of

Ruppia was noted along the south shore of Lake Sallie at the time spraying was done. Re-examination disclosed a complete change in the character of the weed growth. Ruppia was absent and the dominant weeds, all young growth, were Canada Waterweed and Claspingleaf Pondweed.

During the course of the meetings the point was brought up to the effect that perhaps the weeds in these lakes are more resistant to the chemical than in other areas. Aquatic weeds are spread from lake to lake, sometimes over a wide area, by aquatic birds and mammals. The aquatic weeds of these lakes are indigenous to a wide area of North America east of the plain states including southern Canada to some of our south

ern states. Slight variation may occur in a species dispersed over such a wide and differing environmental conditions. However, this variation is exhibited in form and not in general physiologic traits. To develop a resistance to any particular chemical a species of plant would have to be exposed to small and slightly increasing amounts of this chemical for a very long period of time. It is inconceivable that the plants of the lakes in question could have developed a higher resistance to sodium arsenite than similar plants in other regions.

The following lists are the plants observed at inspection points on the three lakes. The lists in no way constitute a complete species list for the lakes:

Scientific Name

DETROIT LAKE

Common Name	Scientific Name
Sago pondweed	Potamogeton pactinatus
Claspingleaf pondweed	Potamogeton Richardsonnii
Water Marigold	Megalodonta Beckii
Coontail	Ceratophyllum dermersum
	Anacharis canadensis
Wild celery	Vallisneria americana
LAKE SALLIE	
Sago pondweed	Potamogeton pactinatus
Claspingleaf pondweed	
Whitestem pondweed	Potamogeton praelongus
Water Marigold	Megalodonta Beckii
Coontail	Ceratophyllum dermersum Anacharis canadensis
Canada waterweed	Anacharis canadensis
LAKE MELISSA	
Sago pondweed	Potamogeton pactinatus
Claspingleaf pondweed	Potamogeton Richardsonnii
Water Marigold	Megalodonta Beckii
Coontail	Ceratophyllum dermersum
Canada waterweed	Anacharis canadensis
Horned pondweed	Ceratophyllum dermersum Anacharis canadensis Zannichellia palustris

Mapping Of DL Quadrangle Is Underway

Through the persistent efforts of Bill Humphrey, North Shore Drive, a 1952 request of the Lake Detroiter Association will be completed in 1956.

The request concerns the topographic mapping of the Detroit Lakes quadrangle boarded by meridians 95° 45' to 96° W and parallels 46° 45' to 47° N. The boundaries in terms of local landmarks would have a north line about a mile north of Callaway; an east border through Eagle Lake (west of Frazee), bordered on the west by a line about a mile west of Audubon, and bordering the Vergas (1912) quadrangle on the south.

Due to lack of funds the State Mapping Advisory Board could not include the Detroit Lakes area before 1954. Photography of the area must be done when there are no leaves on the trees and no snow on the ground, and will be completed either this spring or fall.

Actual ground work will then begin in 1956 and preliminary maps will be available several months later. There is a great deal of work involved, but eventually the Detroit Lakes area will have an excellent topographic map in three coolrs which we hope will be very useful in the many problems which arise in such an important resort area.

Aquatic Biologist Fisheries Research Unit

Insect And Land Weeds Control

Remember the Forest Tent Caterpillars last year in many of the areas near Detroit Lakes?

Your Insects and Land Weeds Committee called this threat to your attention early last year and by acting quickly, effective spraying was performed in most of the Detroit Lakes Zones.

This year the same service is available, at the same cost, \$16.00 per home, to cover four thorough sprayings.

To insure **complete** coverage and proper preparation, mail your check, today, to:

Lake Detroiters Association, Inc. P. O. Box 149 Detroit Lakes, Minnesota

The Boyer Spray Service of Detroit Lakes will work closely with an Association member in **each** zone, to assure complete coverage.

1955 MEMBERSHIP RENEWAL

TO THE SECRETARY, Lake Detroiters Association, Inc., P. O. Box 149, Detroit Lakes, Minn.

Detroit Lakes, Minn.
Attached is my check for \$ as my membership dues for 1955.
The nature of my membership is checked below:
ACTIVE Member () \$ 5.00
ASSOCIATE Member () 2.00
SUSTAINING Member - () 10.00
LOCATION of member's property, or home, on Lake Detroit (please refer to map on center pages for road and beach names—also Neighborhood Group).
NAME of INDIVIDUAL to whom membership card is to be issued:
LAKE ADDRESS
WINTER ADDRESS
Note: Sustaining Members will please write in NAME of BUSINESS FIRM in the space to the right, plus up to 6 words of copy for a commercial listing.

Please check below, the Standing Committees in whose work you are especially interested. Please check at least two.

INSECT CONTROL PROGRAM

To The Secretary, Lake Detroiters Association, Inc., P. O. Box 149, Detroit Lakes, Minn.

I want to participate in the Mosquito Control Program as outlined in the 1955 Bulletin.

My check for \$16 is enclosed herewith, because I realize that the Program must be organized well in advance of the actual spraying dates.
